

June 2022

Dear Library Director:

New Jersey American Water is proud to present our 2021 Annual Water Quality Reports, which are now available online to our customers. Customers may visit www.newjerseyamwater.com and find Water Quality Reports for the municipalities we serve under the "Water Quality" tab.

Our annual water quality report details the quality of water supplied by New Jersey American Water against the compliance standards established by the U.S. Environmental Protection Agency (EPA) and New Jersey Department of Environmental Protection (NJ DEP) and all regulations under the Safe Water Drinking Act. It describes local drinking water sources, testing conducted on the water, substances detected, and the levels of those substances. Commonly asked questions and answers concerning local drinking water are also included.

We are pleased to report that, once again, the drinking water we supplied to our customers meets or surpasses the requirements of state and federal water quality standards for all regulated substances, including those set for lead and PFAS. Our teams of water quality, plant operations, and water distribution professionals work hard each and every day to provide high-quality water service to our customers in 190 municipalities across the state. These annual results are a testament to our employees' dedication to excellence, and we encourage our customers to read the information provided in these reports.

In addition to the water quality report, customers can learn more about New Jersey American Water's environmental stewardship and obtain further information on water quality at www.newjerseyamwater.com.

I hope that you find this report useful and ask that you please post the enclosed flier in an area at your facility where the public can view it and learn how to obtain their Water Quality Report. Thank you for your assistance in educating our customers about their water service.

Respectfully,

Denise Venuti Free
Director of Communications & External Affairs
New Jersey American Water

YOUR WATER QUALITY REPORT IS AVAILABLE ONLINE

View your water quality report online today!

Each year, New Jersey American Water produces a Water Quality Report to let customers know how our water quality stacks up against established federal and state drinking water standards. We encourage you to review this report, because it provides details about the source and quality of the drinking water service delivered to your community.

In an effort to be more environmentally responsible, instead of printing the report, your water quality report can be viewed online at www.newjerseyamwater.com (under Water Quality, select Water Quality Reports), Monday-Friday, 7 a.m.-7 p.m.

For a paper copy, please print one directly from our website or contact our Customer Service Center at 1-800-272-1325.

QUALITY. ONE MORE WAY WE KEEP LIFE FLOWING.
